*Please send special request application form with your request (pages 2-3)

Special Request Workshops:

**Training and Certification of Field Personnel for Post-Tensioning—
Delivered to your Location**

Nationally recognized PTI Training and Certification programs can be presented at your location by experienced industry experts. Train and certify your employees or other group and eliminate travel expenses—we bring the experts to you!

Costs for each workshop to be paid in full to hold dates and before manuals and equipment are sent.

Who should attend: Installers, inspectors, building officials, engineers, architects, etc.

One of PTI's primary goals is to ensure that specifiers and purchasers of post-tensioning materials receive products and services that meet a recognized standard of quality. The PTI certification programs were developed in pursuit of this goal and are now recognized and required throughout North America. Programs include certification for plants producing prestressed concrete strand, unbonded post-tensioning materials, and certification of field personnel.

Certification is required by the codes and specifications that note that installation shall be performed by individuals certified by an independent training and certification program. Individuals certified by PTI have been shown to meet this requirement. Proper training and education of personnel involved in post-tensioning field operations—Installers, Inspectors, Engineers, and others—are vital to ensuring the performance, serviceability, durability, and safety of post-tensioned concrete construction.

STEPS NECESSARY TO SCHEDULE A SPECIAL REQUEST WORKSHOP:

1. PTI proposes dates to the client based on the date range on the application and instructor(s) availability.
2. Client accepts the offered dates and confirms the number of attendees.
3. PTI issues an invoice based on the confirmed number of attendees. The invoice is payable immediately as the offered date(s) are not guaranteed until invoice is paid.
4. A minimum of three weeks is required from the date payment is received by PTI to the first day of the workshop for shipping of materials and reasonable travel arrangements for instructor(s). Initial shipping and handling of books, exam materials, and sample materials / equipment are included in workshop fees.
5. Any shipments of additional workshop materials (manuals, exams, etc.) are charged at the actual shipping cost plus handling, which is 50% of shipping cost.
6. Please note that all exams will be given to all attendees at the same time; it is not possible to administer exams separately for people who need to leave early.
7. The client provides for the workshop: A facility with LCD projector and external speakers for the instructor's computer (for videos); lunch and refreshments during the workshop; facility for field demonstrations (when applicable) including loading/unloading and hoisting.
