The 2002 Research update titled, “Results of Tape Qualification Testing for Tapes used to Repair Damaged Sheathing,” has been retracted. The products listed in the study are no longer commercially available.

Tape used for repairs shall meet the requirements of PTI M10.2-17 Section 2.4.3.2 and:

- Be self-adhesive and moisture proof
- Be nonreactive with sheathing, PT coating, or prestressing steel
- Have elastic properties
- Have a minimum width of 2 in. (50 mm)
- Have a contrasting color to the tendon sheathing
