Dear CRT-100 and CRT-100 Repair Task Group Members,

Attached is the ballot summary showing the resolved negatives from the CRT-100 ballot on the Repair Certification Program Manual. As discussed in the web meeting today, staff will now work at incorporating these resolved comments and the editorial comments, in track changes format, into the document. When this document is available, it will be circulated to the committee for comment before it is published.

The upcoming schedule for the Level 1 & 3 Unbonded PT Repair, Rehabilitation, and Strengthening Certification workshops is fast approaching (first in June 2019) and the following schedule was presented for submission of the remaining workshop items:

- **All case studies need to be prepared and uploaded (directions below) by the May 7, 2019 meeting in Seattle** – this will be the major topic of conversation at the meeting
- **All members are asked to come to the Seattle meeting with relevant repair photos.** Please upload to the PTI website (directions below) or bring a jump drive to the meeting.
- The workshop presentation outline will be prepared by staff and distributed by the Seattle meeting.

We are now able to use the PTI committee website as a file sharing area. To make this possible, you have all been set up as committee “co-chairs” until the convention is over. This allows you to upload files to the draft document area of the committee website.

To access the file-sharing area:

- Login to the website (please let me know if you need help).
- Visit the “My PTI” area at the top right corner of the website to find your committees.
- Two folders have been created under “Draft Documents” in the Work Folders area. Please upload the files here by hovering over the file and clicking “Upload”.
